The book cover features a dark green background with a stylized, glowing globe in the center. The globe is composed of several curved, overlapping bands in shades of white and light green, creating a sense of depth and movement. The title is printed in a bold, white, sans-serif font, with the word 'of' in a smaller size and a different font style. The author's name is positioned to the right of the globe, and the subtitle is at the bottom.

Toward

Citizenship

Creating a Culture of Democracy for the 21st Century

Democracy is everywhere; democracy is nowhere. Virtually every nation on the face of the earth today claims to be a democracy. Yet democracy - a government of the people, by the people, and for the people - has never been achieved except in some of the pre-literate societies. The dilemma of democracy is that it is universally proclaimed, yet its ideals are universally rejected in practice. However those ideals are aspired to and derive from ideas that have a long tradition in western civilization. Citizenship is the companion of democracy. Without citizenship there can be no democracy, and it is through the development of citizenship that democracy becomes possible.

Citizenship

- Constitutional officers chosen by the electors of the state**
- Electors of the state chosen by lot from the legislative districts within which they reside**

That is the question.
